

Broadway Mirror/ Silver Floor

Application Description

High reflective, walk-on, silver floor.

The reflective properties, combined with a PVC base, make this product an ideal eye catcher for a large variety of applications.

While basically designed for flooring applications, the smooth and high gloss surface of Broadway Silver, also makes it ideal for wall covering, truss wrapping, plinth, decorative effects and much more.

A typical application, would be fashion shows, which also could feature reflective ceilings.

The material can be fitted with eyelets and therefore suspended from truss adding greatly to the high impression in events, exhibitions etc.

Broadway consist of a laminate of aluminium and PVC and is tough enough to be used on dance floors (restrictions apply for certain applications, pls. refer to our specialist).

For applications, which do not require a smooth silver surface, but would benefit from a flexible silver PVC material, Broadway can also be supplied in embossed surface pattern.
