

Presenter and Presenter Pro

Presentation and Image Control Software

Imagine there is a software...

... that can greatly enhance the quality of your presentations
 ... which allows you to mix different media of all kinds
 ... which helps you managing the projector (keystone, color...)
 ... which gives you the perfect feeling in all business presentations
 ,, which can be used as a point of sale software

VIOSO Presenter allows all this and more

[Free Download now](#)

VIOSO Presenter and Presenter Pro is the ideal tool for any presenter, staging and rental company, display designer and educators.

Both software versions allow for image control of the build-in presentation module or anything which can be displayed on the desktop.

Presenter Pro provides additional image shaping technology and camera based image calibration. (For camera based image calibration please refer to our separate datasheet and www.vioso.com website.

Technical Data:

VIOSO Presenter and Presenter Pro are PC based softwares, which operate under Windows XP, Vista and Windows 7.

VIOSO Presenter is available as a download software with authentication key. As CD or on USB stick.

The USB stick version can be used on any PC without authentication and administrator rights. Presenter allows for image rotation, mirror image, keystone adjustment.

It features a presentation module and automated presentations.
